

Head, Heart, Hand

Understanding, Evidence & Impact

Does this make sense and does it improve safeguarding outcomes?

- Does this idea make sense in the context of multi-agency safeguarding?
- Is this in the best interests of babies, children and young people, now and in the long term?
- What stands out as particularly strong or concerning about this idea?

Feelings, Values & Lived Experience

How does this feel for babies, children, young people and families?

- How might babies, children and young people experience or feel about this in practice?
- How might families and carers feel about this approach?
- What feels positive, caring or reassuring about this option from a safeguarding perspective?

Action, Delivery & Barriers

What will it take to make this work in practice?

- What are the practical challenges in putting this idea into action across agencies?
- Who might be most affected by these challenges (babies, children, young people, families, practitioners)?
- What support, resources or partnership working would be needed to make this work well?
